

**REMARKS**

Applicant requests that the prior art references set forth in the respective Supplemental Information Disclosure Statements of March 15, 2007, August 31, 2007, October 16, 2007, December 6, 2007 and January 30, 2008 be reviewed and made of record.

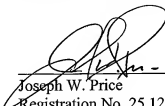

The newly drafted claims are within the scope of the original invention and the previous Preliminary Amendment pointed out locations in the specification and drawings the various terminology, such as "acquire unit," "processor," "controller" and the functions involved in decoding the graphic data, and writing the graphic data in a graphic plane.

It is believed that these newly drafted claims more than likely distinguish over the new references of record, and an early notification of allowance is requested.

If the Examiner believes a telephone interview will help further the prosecution of the case, the undersigned attorney can be contacted at the listed phone number.

Very truly yours,

**SNELL & WILMER L.L.P.**
